DRILLING FLUIDS AND WET WASTE TREATMENT AND DISPOSAL SERVICES

Shepherd Materials, in cooperation with J.P. Mascaro, offers a unique, full service, and cost-effective treatment and disposal solution for industrial fluids and wet waste materials. Situated in Colliers, WV, on Brooke County Landfill property, Shepherd's solidification process incorporates the use of approved drying agents, mixed with liquid and wet waste to create a solid, dry material suitable for direct placement in the fully permitted Brooke County Subtitle D Landfill.

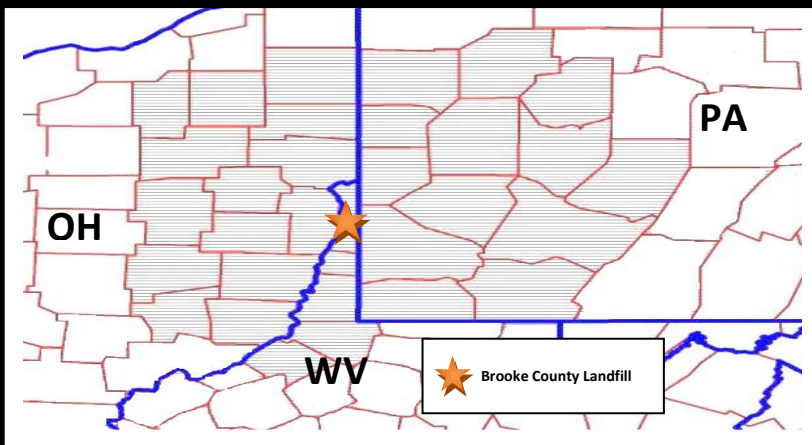

ADVANTAGES

- Rapid waste approvals
- Certified scale receipts
- No appointment needed during receiving hours
- Quick in and out for trucks (no unloading delays)
- Permitted, covered, treatment building with concrete containment floor
- Fully permitted, double lined, Subtitle D landfill
- Excellent compliance and safety record

WASTE ACCEPTED

- Wet drill cuttings
- Flowback fluids
- Drilling muds
- Pipeline directional drilling fluids
- Frack tank cleanouts
- Frack sands
- Stormwater
- Other non-hazardous waste liquids
